ABOUT ME

I am from Brazil, living in Netherlands since 2021. Swimming and camping are my hobbies.

TECHNICAL SKILLS

Programming

HTML5, CSS, Javascript, Typescript, Vue3.js, Axios, SCSS, Web Components

Tools

Visual Studio Code, Git, GitHub, Bitbucket, Pinia, Vuex, Nuxt, Webpack, Vitest, Tailwind CSS, Jira, Confluence, Figma

Languages

English, Portuguese (Native)

EXPERIENCE

DTT - web, apps, games

March/2024 - Sep/2024

- I contributed to various internal and external projects (PWAs, websites, CMS) at multiple stages, from inception to maintenance of established projects. I had the opportunity to collaborate with UI/UX designers, frontend, and backend developers, gaining valuable insights into the entire development and delivery process. Using the Agile methodology, this experience has significantly enhanced my skills and contributed to achieving outstanding results.
- **Tools:** Vue.js, Vue3.js, Pinia, Vuex, Astro, Nuxt, CSS, SCSS, Git, Bitbucket, Axios, API, Jira, Confluence
- **Some Projects Descriptions:** [SlimAcademy](#), [Fixify](#), [World Metal Exchange](#), [MediaMasters](#)
- **Some projects companies:** [Bocca](#), [Teladoc](#), [Chilifestyle](#), [Fixify](#), [SlimAcademy](#), [Trimbos](#)

Freelancer

September/2023 - March/2024

- I had the opportunity to work for a startup as a freelancer, giving life to their ideas for preview websites to be presented to investors. You can see one example of a CMS for charging stations
- **Utilized:** Vue3.js, Pinia, CSS, SCSS, LocalStorage, Git, Github, Axios, API
- **Project:** [ChargeGuard](#) (login: admin@admin.com / password: admin)

PERSONAL PROJECTS

Weather Track

Live preview: [CheckWeather](#)

- This is an in-progress project where I used Vue3.js to create an application where the user can see the weather information of a location by searching it by name. It also allows users to save cities and view their current weather on the home page.
- **Utilized:** Vue3.js, Typescript, Pinia, Tailwind CSS, LocalStorage, Git, GitHub, Axios, API
- **Project:** <https://github.com/cristinakellyt/check-weather>

Entertainment App

Live preview: [EntertainmentApp](#)

- This is an in-progress project where I am using Vue.js. I am using concepts like vue-router, components, Pinia as store management, and LocalStorage. In this project, the user can see available movies, tv-series and bookmark them.
- **Utilized:** Vue3.js, Pinia, SCSS, LocalStorage, Git, GitHub
- **Project:** <https://github.com/cristinakellyt/entertainment-web-app>

House Company

Live preview: [HouseCompany](#)

- This is a project where I used Vue.js to create an application where the user can see the available houses for sale and see their details. It is also possible to place new houses for sale through a form where the user provides all the information, being able to edit or delete it later.
- **Utilized:** Vue3.js, Pinia, SCSS, Git, GitHub
- **Project:** <https://github.com/cristinakellyt/house-listing>

Pomodoro

Live preview: [Pomodoro](#)

- This is Pomodoro with basic features that I started in vanilla Javascript using OOP, and changed to Typescript.
- **Utilized:** Typescript, SCSS, Webpack, Web Component, Git, GitHub
- **Project:** <https://github.com/cristinakellyt/Pomodoro>

Order Summary

Live preview: <https://ckorder-summary-component.netlify.app>

- A project where the user can select the type of its order and fill in the form of payment details.
- **Utilized:** Vanilla Javascript, CSS, Git, GitHub
- **Project:** <https://github.com/cristinakellyt/order-summary-component>

Interactive Rating Component

Live preview: <https://zk-interactive-rating-card.netlify.app>

- A project where the user can select a rate for some service and see a confirmation modal appearing after clicking the 'submit' button.
- **Utilized:** Typescript, SCSS, Webpack, Git, GitHub
- **Project:** <https://github.com/cristinakellyt/interactive-rating-component>

Advice Generator

Live preview: <https://zk-advice-generator.netlify.app>

- A project where the user can click on the dice to see new advice on the screen.
- **Utilized:** Vanilla Javascript, Axios, SCSS, Webpack, Git, GitHub
- **Project:** <https://github.com/cristinakellyt/advice-generator>

To Whom It May Concern:

I am pleased to write this letter of recommendation for Cristina, whom I had the opportunity to work with for five months during her front-end development internship. During her time at our company, Cristina consistently demonstrated her value and a strong work ethic.

Cristina has a strong ability to write clean, well-structured code, even when handling complex tasks for both logic and UI. She contributed to twelve different projects using the Vue framework and consistently demonstrated a solid understanding of CSS, JavaScript, and Vue. She always took her responsibilities seriously, and I could trust her to handle tasks independently. After reviewing her code on numerous occasions, I can confidently say that the quality of her work consistently meets high standards.

Based on my experience working with her, I believe Cristina would be a good asset to any team, and I'm happy to recommend her.

Sincerely,
M. Wolters
Developer
